

FATHER ME

HEALING TESTIMONY for TMJ

by Sis Juliana Yong

Healing through FATHER ME model is truly remarkable. We need to be sanctified to the maturity in Christ before we can successfully enter the destiny God has for us.

I would like to testify how FATHER ME healed me of Temporomandibular Joint (TMJ), a physical condition caused by stress on the joint creating inflammation and damage to the tissue not once but twice several months apart.

Several months ago I experienced sudden pain more like muscle camp over my left shoulder and arm. Thinking it was just muscle stiffness I prayed for the dull ache to go away and went straight home. The pain worsened and in desperation solicited prayer of several intercessors. They responded with love and concern. As it drew close to midnight, my left shoulder had gone stiff and the pain was unbearable. I cried out to God to heal me. It was so painful that no sleeping position could relieve it. I had to sit up on my bed leaning against the wall all night and cling on to Psalm 121:1 "I will lift up my eyes to the hills, From whence come my help? My help comes from the Lord, Who made heaven and earth."

As dawn came I rushed to a nearby clinic. On the other hand, in the same afternoon I had an appointment with Rev Alicia for FATHER ME session. A decision was made to see the medical doctor first for some painkillers

to enable me to sit through the session with her. The doctor examined and confirmed injury of shoulder tendon, the joint area and prescribed painkillers, and cream. He advised rest as complete healing will take one to two weeks. I was devastated as I did not wish to bear the pain for one to two weeks. A day of intense pain was already unbearable.

During FATHER ME session, Rev Alicia shared how physical illness is linked to emotional roots. Through the leading of the Holy Spirit Rev Alicia wasted no time in discovering the Medical Root of my pain. The Holy Spirit's Healing Presence was strong as we revisited the scene of how I took on my grandmother's anger as a five year old child. She uprooted my emotional roots of anger and bitterness. As she prayed I felt a strong heat as the stiffness left my left shoulder. At the end of the session I could move my arm and experience instant healing! Glory to Jesus!

The 2nd miracle healing took place during our church renovations and crossover. This time the pain hit my right shoulder and arm! God is indeed humorous. The pain hit me two days after we were packing in Marymount premise preparing for the relocation on 12th March 2013. The same doctor who treated my left arm months ago could only prescribe painkillers and observation.

On Wednesday night, Rev decided to do FATHER ME HEALING over the phone for me when she was still recovering from gastric. She named the medical condition TMJ and linked to roots of resentment, unforgiveness, false expectation, anxiety and stress and to do repentance.

She then went ahead to pray and ask God to give new joint, new tissue. The next morning, I decided not to use painkillers but placed my faith in last night's healing prayer. The pain lessened and by the end of the day it was completely gone and I could move my right arm and shoulder!

God heals my TMJ condition through FATHER ME Healing not once but twice. In my case the healing surpassed western and traditional Chinese practitioners. I was surprised that distance healing can be applied for Father Me Emotional Healing as well. I thank God for our Senior Pastor Rev Alicia who founded FATHER ME Healing Programme. Her love, dedication and commitment for the saints in affliction is beyond measure. To God be the glory!
