

# TRANSFORMED THROUGH FATHER ME

Dear Rev. Alicia,

Reverend, here is my testimony from the time I met you until our encounter with God on your Father Me Program.

It is good to know the effects of the past experiences and chapters of our life. Prior to this, I do not know why we should know the past that took place in our life. I thought this thing had nothing to do with our present. It truly took me by surprise.

I was brought up in a family where my father, being a fulltime pastor, had no time for us. He concentrated on the ministry so much that he was insensitive to his children's needs of a role model of a father. I resign to this situation because I thought it was normal.

There were times when I fall sick as a child and long to have him by my side but he was not there when I needed him the most. I felt neglected and I did not even have the opportunity of spending quality time with my father. I thought that the past was the past and it will not affect my future. After several trials and testing, I eventually choose to follow my father's footsteps and heed to the call of God.

My trauma starts when I was blessed with my first child. In the course of my pastoral journey, I arrived at the point of realizing that I was going through the same cycle of my father of suffering from lack in the household.

Fear kicks in, and I started asking God this question, "Is this the life for those You have called?" I asked this question because it happened to us during the early years of my father's ministry and it is also happening to me.

At the point of my despair, the Lord sent someone who brings light in my darkest time of my ministry. Since the time I first met her and work with her in the Philippines, I felt a strong desire to learn more about her and her principles for having a successful ministry.

While being with her, I came to know and learn the biblical principle on how to fully receive the breakthrough of the Lord's abundant blessings and to have the real freedom from the poverty that is happening in our lives.

As the days passed by, I started to see changes in our situation as I applied and exercise the biblical principles I learned from the Mighty Woman of God. I also began to notice the changes in financial and material aspects of my family and ministry. I was amazed when all the hardship, fear and difficulties began to improve. I acquired a lot of biblical knowledge from her as I sat under her ministry. What she imparted to me has opened the gates of Heavens for my family.

The Mighty woman of God is none other than Rev. Alicia Teo my spiritual mother. We only need to know the real principle of breakthrough to get out of the poverty. I thank God as my father and I learned the principle.

I thought this knowledge was adequate. I have forgotten all the pains and hardships I suffered from childhood. It was only in December 2011 that we were invited by Rev. Alicia to attend the Church Camp in Singapore. We were excited.

Little did I know that God has more in store for us when we got there. It is not about the travel, not about the good food we are to eat, not even the expensive hotels and places we are going to stay but what was awaiting us was more than a precious jewel.

The day after our arrival, my wife and I had a one-to-one counselling with Rev. Alicia and that was the most beautiful experience I had in my whole life. In the course of our counselling she shared about her Father Me Re-parenting Program, which caused a spiritual awakening in my spirit.

I began to understand that our present behavior and attitudes were caused by our parents' inappropriate parenting during the early years of our life.

We tend to react childishly as we have built into our human brain the emotional and physical abuse inflicted by our parents, caretakers, teachers and elders. I did not realize that there is a wounded child within me who was controlling my present life.

Through Rev. Alicia's Father Me Re-parenting program I came to understand that this wounded child is the cause of our fear, inferiority complex and lack of self-confidence that have been a hindrance to our lives.

While Rev. Alicia was talking to us explaining the outcome of my past, tears started to flow from my eyes as she brought me back to the past to face my pain and allow our Heavenly Father to heal us and re-parent us through a sanctification program.

While I was listening to her attentively I did not stop myself from breaking my silence and I started crying like a child. After the counselling my wife and I had with Rev. Alicia I sense an unspeakable and unexplainable joy in my heart, I was enlightened and fear miraculously disappeared. Today I can say, I am free from the shadow of my past.

Our ministry is growing both numerically and spiritually as well as financially and we are now more confident to face every challenge besetting us. My life no longer was a challenge after the healing. To God be the Glory!!!

If you want to be set free and enlightened then I exhort you to undergo Father Me Re-Parenting Program.

Thank you Rev. Alicia

In Christ our Lord,  
Ps. Joseph Blanco
